SUMMARY

Data Science graduate from Multimedia University (First Class Honours, 3.91 CGPA, Yayasan Telekom Malaysia Scholar) who builds production-ready AI systems, not just models. Experienced across the full stack with Python, FastAPI, Next.js, and Docker, along with hands-on work in computer vision, NLP, and LLM-powered pipelines. Built an explainable academic reviewer-matching platform with 89% expert-level relevance and deployed enterprise workflow automations during internships at Juara Partners and Verdant Solar.

PROFESSIONAL EXPERIENCE

- Verdant Solar Holdings Berhad, Digitalization Intern**08/2026 – 09/2026 | Ara Damansara
 - Architected and maintained automated workflows using n8n, Activepieces, and Zapier within **Monday.com** to streamline internal operations and resolve digitalization support tickets.
 - Configured KIRO & MCP integrations alongside custom JavaScript-based Meta API scripts to seamlessly connect and extend internal systems.
- Juara Partners, Data Science & AI Engineer Intern**07/2025 – 10/2025 | Kelana Jaya
 - LLM-Powered WhatsApp Chatbot:** Architected and deployed a self-hosted conversational AI platform using Docker, Cloudflare, and n8n, integrating the Meta Business API alongside Pinecone and Google Cloud RAG pipelines, and built a real-time Next.js admin console.
 - Malaysian IC OCR Solution:** Developed an end-to-end document verification pipeline combining Python and PaddleOCR (PP-OCRv3) with GPT-4o-mini post-processing to extract unstructured MyKad data with high fidelity and automate CSV exports.

EDUCATION

- Bachelor, Computer Science (Hons.) (Data Science), Multimedia University**08/2023 – 08/2026 | Cyberjaya, Malaysia
 - CGPA: 3.91 — Graduated with **First Class Honours**
- Foundation, Information Technology, Multimedia University**07/2022 – 07/2023 | Cyberjaya, Malaysia
 - CGPA: 3.91 — Dean's List in every trimester
- Highschool diploma, Sijil Pelajaran Malaysia, SMK Bukit Mewah**01/2021 – 02/2022 | Seremban, Malaysia
 - SPM Results: Achieved 10A (5A+, 3A, 2A)

SKILLS

Language Proficiency Malay (Intermediate), English (Fluent), Tamil (Fluent), Korean (Beginner)	Languages & Tools Python, SQL, R, C++, Java, HTML/CSS	AI/ML LLM RAG pipelines, transformer embeddings (SPECTER), recommendation systems, computer vision (MediaPipe, YOLOv8)	Frameworks & Infra FastAPI, Flask, Next.js/TypeScript, Docker, n8n, Cloudflare
Data & BI Power BI, Excel, data analysis	Soft Skills Leadership, communication, problem-solving, continuous learning		

CERTIFICATIONS

- Google AI Professional Certificate**
 - Issuer: Google
 - Date: 2026-09
- AWS Educate Machine Learning Foundations**
 - Issuer: AWS Educate
 - Date: 2025-03
- Power BI Desktop**
 - Issuer: LinkedIn Learning
 - Date: 2025-03

PROJECTS

- ARMS — Automated Reviewer Matching System, Final Year Project**11/2025 – 06/2026
 - Built a full-stack academic peer reviewer assignment platform using SPECTER transformer embeddings trained on citation graphs
 - Self-scraped 493 experts & 10,817 publications from Google Scholar; applied recency decay for temporal relevance scoring
 - Integrated a Groq 120B LLM RAG pipeline to generate explainable per-recommendation justifications
 - Achieved 89.3% expert-level relevance at 0.4s per query on a real conference dataset
- FocusMirror — Real-Time Focus Tracker, Personal Project**06/2026 – 06/2026
 - Used MediaPipe Face Mesh (Eye/Mouth Aspect Ratio) with GPU-accelerated YOLOv8 phone detection via a custom debounced state machine
 - Streamed live classification results (Focused / Distracted / Sleepy / Away) via FastAPI WebSocket to a Next.js/TypeScript frontend
 - Exported session analytics (time-per-state, phone pickups, focus streaks) to CSV; fully local, zero data leaves the device
- LLM-Powered WhatsApp Chatbot, Internship Project**07/2025 – 08/2025
 - Architected and deployed a self-hosted chatbot using Docker, Cloudflare, and n8n workflow automation
 - Integrated Meta Business API for WhatsApp routing; built real-time Custom Agent Console in Next.js via ngrok
 - Extended at Juara Partners with OCR pipelines and webhook-based automation systems

CO-CURRICULAR ACTIVITIES

- Data AI Community, Skills Development Head**01/2026 – 07/2026

Hosted two technical workshops at Agmo Space, MMU: one on n8n automation (Docker and Cloudflared setup for self-hosted workflows) and one on Power BI for data analytics and visualization, giving students hands-on experience with practical tools.
- SRC MMU, Vice President of Student Academics and Excellence**01/2023 – 2024

Oversaw all academic matters across MMU, including the academic calendar and internship programs, working closely with the Career Connect Department.
- SRC MMU, Executive Officer of Students' Academic and Education Division (SAED)**01/2022 – 2023

Contributed to the MMU community by opening new study spaces in two faculties, benefiting over 500 students, and by extending library operating hours and enforcing library policies to improve access for students.
